

MySQL Practice – Student Database

1. Login to MySQL

```
mysql -u root -p
```

2. Show Databases

```
SHOW DATABASES;
```

3. Create Database

```
CREATE DATABASE SummaiyaDB;
```

4. Use Database

```
USE SummaiyaDB;
```

5. Create Table

```
CREATE TABLE students (  
    StdID INT,  
    StdName VARCHAR(45),  
    StdAGE INT,  
    StdCity VARCHAR(50)  
);
```

6. Insert Data

```
INSERT INTO students VALUES (1, 'Ali', 26, 'DG Khan');  
INSERT INTO students VALUES (2, 'Hammad', 27, 'FaisalAbad');  
INSERT INTO students VALUES (3, 'Hammar', 28, 'FaisalAbad');  
INSERT INTO students VALUES (4, 'Asghar', 29, 'Taxila');  
INSERT INTO students VALUES (5, 'Atif', 30, 'Wahcantt');
```

7. View Data

```
SELECT * FROM students;
```

8. Conditions

```
SELECT * FROM students WHERE StdAGE < 28;  
SELECT * FROM students WHERE StdAGE > 28;
```

9. Add Column

```
ALTER TABLE students ADD COLUMN StdCOUNTRY TEXT;
```

10. Update

```
UPDATE students SET StdCOUNTRY = 'Pakistan' WHERE StdID = 1;  
UPDATE students SET StdCOUNTRY = 'Pakistan' WHERE StdAGE < 30;
```

11. Delete

```
DELETE FROM students WHERE StdCOUNTRY = '';  
DELETE FROM students WHERE StdCOUNTRY IS NULL;
```

12. Modify Table

```
ALTER TABLE students ADD email VARCHAR(100) AFTER StdAGE;  
ALTER TABLE students DROP email;  
ALTER TABLE students CHANGE StdAGE std_Age VARCHAR(100);
```

Final Data:

1		Ali		26		DG Khan		Pakistan
2		Hammad		27		FaisalAbad		Pakistan
3		Hammar		28		FaisalAbad		Pakistan
4		Asghar		29		Taxila		Pakistan
